2020г.

Create your packaging design in seconds! I think these are the easiest to use templates you can find. Simple, non-confusing Photoshop layers setup. Use it for packaging project presentations, product mockups, online shops etc.

A great way for any creative person to show off their work. In this Adobe Photoshop file you can create your own fully customisable packaging project where you can display your own brand.

own orano.

You can easily put your branding or logo on these mock-ups with smart objects. We have a smart object in the smart object with smart object of the propriet of the

All objects are separate layer groups with plenty of layers for more control.

Control.

- Smart object - Easily add your own logo and information

- Change colors of background

+ High quality FSD file

- Realistic even with close up

- Realistic even with close up

- Realistic even with close up

- All in layers (product, branding, highlights, shadows and reflections)

- All linghights and shadows on the labets

are in different layers, easily maround

- Change text
